## WORK EXPERIENCE

---

### Senior Software Engineer

Thinkwik Private Limited, Gujarat, India

Full-Time

May 2024 - Present

- Designed and implemented a secure, high-performance backend architecture using **Express.js** and optimized data management with **MongoDB**.
- Developed a scalable **data marketplace**, integrating open-source APIs with authentication, configurable request handling, and response normalization using AI-driven prompts.
- Deployed and managed cloud infrastructure on **AWS EC2**, optimizing media storage with **AWS S3** and **CloudFront** for secure, low-latency content delivery.
- Implemented **CI/CD** pipelines using **GitHub Actions**, automating deployment workflows for efficient and reliable application releases.
- Configured and managed server environments, including **DNS** mapping and domain setup to ensure seamless application deployment.
- Deployed applications on **Azure Static Web Apps** and **App Services**, integrating **Blob Storage** and **Cosmos DB** with a serverless architecture for scalability.
- Enhanced API security and flexibility by dynamically injecting role-based authentication headers and filtering query parameters in middleware.

### Software Engineer

Arsenaltech Private Limited, Gujarat, India

Full-Time

June 2023 - April 2024

- Developed a virtual care solution for the US market using **Node.js**, integrating **Redox** and **OpenEMR** APIs.
- Implemented **OAuth 2.0** and **JWT** for secure API access, ensuring HIPAA compliance.
- Designed **MongoDB** schemas with **Mongoose** and developed role-based API middleware.
- Designed and implemented **APIs** in **NestJS** for seamless patient and doctor workflows.
- Integrated **Redox** and **OpenEMR** for comprehensive patient data management.
- Utilized **MongoDB** with **Mongoose** for efficient data management.
- Built an **Amazon Lex ChatBot** for patient questionnaires, using **AWS Lambda** for validation.
- Configured secure authentication with **Auth0**, ensuring data privacy and compliance.

### Software Engineer

Crest Data, Gujarat, India

Internship + Full-Time

Dec 2021 - May 2023

- Integrated **SIEM** platforms like **Elastic**, focusing on security and observability.
- Incorporated integration packages (Google Workspace, AWS, Cloudflare, LastPass) into Elastic using **Elasticsearch**, **Logstash**, and **Kibana**.
- Developed REST APIs for log ingestion into **Elasticsearch** with **Node.js**.

## EDUCATION

---

### Charotar University of Science and Technology

Bachelors in Computer Engineering - CGPA 9.19

Anand, Gujarat, India

June 2018 - June 2022

## TECHNICAL SKILLS

---

- **Programming Languages:** JavaScript, TypeScript.
- **Frameworks & Libraries:** Node.js, Express.js, NestJS, React.js, Socket.io.
- **Databases & Version Control:** MongoDB, PostgreSQL, MySQL, Git (GitHub, Bitbucket).
- **Cloud & DevOps:** AWS, Azure, GCP, Docker, CI/CD, Terraform.

## PROJECTS

---

### Mobile Advantage — Employee Tech Benefits & Device Recycling Platform

- Developed **RESTful APIs** in **Node.js** for an employee benefits platform offering savings on new and refurbished tech devices.
- Built an **e-commerce portal** with product browsing, trade-in valuation, and device recycling workflows.
- Integrated **PayPal Credit** and **Klarna** for flexible payment options including interest-free installments and salary deductions.
- Implemented **SIM-only airtime** and **device insurance** integrations with carriers like O2, Vodafone, and Three.
- Developed a **trade-in and recycling module** with instant device valuation, cashback processing, and CO2 impact reporting.
- Built **role-based access** for employers and employees with scheme administration, shipment tracking, and order management.
- Utilized **MongoDB** for managing product catalogs, user accounts, orders, and carbon footprint analytics.

### Bering Health - Virtual Care Solution (US Market)

- Designed and implemented **APIs** in **NestJS** for seamless patient and doctor workflows.
- Integrated **Redox** and **OpenEMR** for comprehensive patient data management.
- Utilized **MongoDB** with **Mongoose** for efficient data management.
- Built an **Amazon Lex ChatBot** for patient questionnaires, using **AWS Lambda** for validation.
- Configured secure authentication with **Auth0**, ensuring data privacy and compliance.

### ThisWorks - Employer of Record (EOR) Management Platform

- Designed and implemented **RESTful APIs** in **Node.js** for Admin, Client, and Employee workflows including onboarding, leave management, and compliance.
- Built a **role-based access control** system to ensure secure, transparent interactions between Admins, Clients, and Employees.
- Utilized **MongoDB** with **Mongoose** for efficient management of employee records, contracts, payslips, and invoices.
- Developed **document verification** and **digital onboarding** modules to streamline employee lifecycle management.
- Implemented a **leave management** system with approval workflows and a centralized dashboard for real-time tracking.

### Exchange Robotics - Scalata.ai — AI-Powered Financial Intelligence Platform

- Architected **RESTful APIs** in **Node.js** for an agentic AI platform serving credit analysis, lending, and capital markets.
- Built a **dynamic request builder** with support for **OAuth**, **OAuth 2.0**, **Bearer Token**, and **Access Token** authentication.
- Implemented a **response key mapper** for selective field extraction and data binding from third-party API responses.
- Developed integrations with **Google Drive**, **OneDrive** and **Amazon S3** for real-time data access.
- Utilized **Azure Cosmos DB (NoSQL)** for scalable storage with governance controls.
- Deployed on **Azure App Service**, **Azure VMs**, and **Azure Static Web Apps** with multi-cloud support.
- Implemented **enterprise quota management** with granular controls and real-time usage analytics.

### Holla App Me - Social Media Platform

- Built a scalable social media app using **Node.js** and **MongoDB**.
- Implemented real-time chat with **Socket.io** and media sharing via **Signed URLs**.
- Integrated voice and video calls using **GetStream.io**.
- Added live location sharing and user mapping with **Google Maps API**.

## ACHIEVEMENTS

---

- 1 x AWS Certified
- Earned 5-star ratings in Basic, Intermediate and Advance **Hackerrank Problem Solving**
